SPECIALISTS IN GLADIOLUS

PLAINVILLE, CONN.

To Our Customers and Friends:

January, 1952

We take pleasure in presenting herewith our catalog for 1952, in which is listed some three hundred varieties of gladiolus covering a wide range of colors in all size groups. Our listings, containing the best of the newer and older domestic varieties, as well as many outstanding European and Australian originations, are designed to meet the tastes of all growers from novice to professional.

We have had an excellent growing season, although no excess rainfall except at digging time which gave us some trouble in getting all the stock in. I understand that some growers had to leave in acres of bulbs, also am told that in a lot of sections bulbs didn't size up as in past years. This will mean a short crop in No. 1 bulbs.

Our crop of bulbs is the finest and the largest we have ever produced; the stock being clean, free of disease and thrips. Should you favor us with an order, you will be assured of receiving top quality, young, high-crowned bulbs, carefully selected and guaranteed true to name. However, in anticipation of continued heavy demand for our quality bulbs, we strongly urge your prompt action in placing orders to avoid possible future disappointment in not being able to get the variety or size bulbs you want.

While doing the rounds of shows and here in our gardens, we met many old friends and made new ones, and it is a pleasure we look forward to. We welcome your personal visits to BIRCHVILLE GARDENS as well as your communications, we admit at times we were slow in replying but hope this is all in the past with the new setup we have planned for 1952.

With sincere thanks for your confidence in Birchville Gardens as evidenced by your past patronage, and with best wishes for a banner GLAD season in 1952, I am

Sincerely yours,

JAMES A. MILO

BIRCHVILLE GARDENS INTRODUCTION FOR 1952

KAREN (Mazur)

Here is an outstanding new novelty for 1952. It is such an unusual variety that I am sure it is destined to go places, both as a commercial cut flower and for exhibition, and for the home garden.

COLOR — Clear medium magenta shading lighter toward the throat, with the three lower petals having a large sulphur yellow throat. According to the British Color Chart this variety's basic color is Indian Lake Red.

FLORETS — 6 to 8 well placed five inch florets open on an 18-21 bud spike with six more showing color, with a flowerhead of 28 inches.

STEM — Not heavy but strong, and straight. The florets are firmly attached making it easy to handle.

SUBSTANCE — Unusually good and stands up well for a long time. Spikes shown at Western Massachusetts show were held for 10 days and were still good at the end of the show.

RELIABILITY — Very reliable in all ways, wherever grown. A heavy or good propagator, good grower and uniform bloomer from large or small bulbs, and it is healthy.

Spikes of KAREN were shown at the large Western Massachusetts show where it received an Award of Merit and also was the most popular variety in the show by public vote.

At the Rhode Island trial gardens this received the highest score for the year, 85 in a very trying season.

We had no intention of introducing KAREN until 1954 but have had so many requests for stock that we have decided to offer it this season at a higher price releasing a limited amount of stock.

Dear Jim:

If you haven't got your catalog ready for the printer, may I have the privilege of writing the introductory caption for "Karen", with you furnishing the color description. This may sound like Carl Fischer but it sure fits the variety.

Karen, is destined to become one of the most popular and sought after varieties introduced. Its beauty will stamp an indelible picture on your mind. Its color captivates the imagination like a page out of a book of Fairy Tales. If the little Fairy Folk gather in the dew of your garden. They are sure to pick the spot where Karen is planted to congregate. No one can resist her beauty.

I am not trying to write your catalog Jim but I just can't get this Glad out of my mind. It affects me just the way I have written about it sort of unreal and impossible. I predict that like Conn. Yankee, it will be on top for a long time to come.

Very truly yours,

LEO P. T. JACQUES

(The above letter was received after type had been set up on Karen. Mr. Jacques is one of the founders of the Western Massachusetts Glad Society, being their first president, and the present secretary.)

FROM JOE HARTMAN

MESA MIST (Hartman) Sport of Pastel

We need more glads with original color-combinations and this certainly is one of them. A plain petaled floret with a bluish toned light grey, shading lighter toward the throat area, with an indistinct brush mark on lip petal, holds five to seven open on a 24 inch flowerhead, growing up to 50 inches tall. The above description was from the originator, as it grew here this past summer it was much taller, up to 65 inches tall with a 28 inch head. This glad has been the recipient of a lot of favorable comments this past summer. Am sure that this will become popular with show fans, and certainly one for road side sales.

Price: \$2.00 any size bulb. Bulblets 10 for \$2.00.

No bulblets sold separately, but you may purchase 10 with each bulb.

FROM ARTHUR A. ARENIUS (Originator's description)

GLAD TIDINGS (Arenius 52) 460

Seedling 48183 (Conn. Yankee X Fuchsia Belle)

A clear, soft rose. A beautiful color which we have been watching for the past three years. The increase and bulblet growth has been so good that we are putting it on the market earlier than had been planned. About 55" to 60" tall, "GLAD TIDINGS" grows straight and sturdy and opens 6 to 7. The 5 to 5½ inch blooms have perfect double row placement. This we think is the finest of the rose colored glads and well worth watching.

Each: Large \$5.00 Medium \$4.00 Small \$3.00 Bulblets \$1.00

PINK PRIDE (Arenius 52) 530

Seedling 4832 (Miss Wisconsin X Buena Vista)

A strong growing light rosy salmon of extremely heavy substance. Opens 8 to 9, 5½ to 6" blooms on an 18 to 20 bud flowerhead. Very formal placement of wide open blooms. Bulblet production is heavy with good germination and growth. Plant growth is unusually husky and healthy, which, along with the heavy texture and strong attachment of the blooms, should add to its desirability as a cut flower.

FROM F. X. GRAFF (Originator's Description)

Tomahawk (RED CHARM X RED SEEDLING)

Tomahawk a very lovely shade of scarlet with just enough red in it to make the florets outstanding. There are a few pencil line stripes in the throat which comes down about half way on the lower lip petal, giving the impression of a scarlet without markings. There is a tendency for recurvment and frilling on the outer edges of the petals. It opens very well in water from all types of bulbs and all stages of cutting. A very healthy introduction that Glad Meadow is proud to introduce and dare say one of its best. It blooms very well from bulblets, stands straight on a willowy stem with good placement and green healthy foliage. Tomahawk blooms in about 85 days attaining a complete height close to five feet (58) inches. The flower head is 28 inches in length, with a total of 20 buds. The facing is perfect with formal placement, its lasting quality is good, has plenty of vigor with good texture, will open six in the field and 8-10 indoors. It has a very firm attachment which is desirous of any good gladiolus. Tomahawk was one of the healthiest growers that we had in our fields. We recommend it very strongly to you as one of the better buys for such a high calibre gladiolus. Bulblet production, very good with good germination.

Price very reasonable:

Each: Large \$2.50 Medium \$2.00 Small \$1.50 10 Bulblets \$2.50 100 Bulblets \$20.00

Unit B — 5 Large 5 Small 5 Medium 1,000 Bulblets for \$100.00.

FROM TED WOODS (Originator's Description)

Rosita (ELIZABETH THE QUEEN X CHAMONNY)

Rosita a very lovely shade of light rose with just enough darker rose in the throat to make the florets outstanding. The florets are frilled and carry the fluting of Elizabeth the Queen, having a narrow white edging. They are wide open and very firmly attached to the stem. There is a tendency for slight recurvment. Its growth is spectacular, attaining a height of 62 inches. The flowerhead reaching a length of 30 inches with a total of 24 buds which open 10 to 12 with the balance showing color. Its texture is heavy, its placement is perfect, definitely a 500 Glad. A very vigorous grower with a strong straght willowy spike. It blooms as an early medium in about 80 days. The bulblet production is excellent with perfect germination. Its facing is perfect and formal in placement. Rosita was one of the healthiest growers in our fields. It opens well when cut tight in bud and its lasting qualities are exceptional. A very desirable Glad for exhibition and commercial growers as its shipping qualities are outstanding. We recommend this high caliber gladiolus very strongly as one of the best commercial buys at a very reasonable price.

REMARKS:

From WEEK'S GLADIOLUS GARDEN (Originator's Description)

POINSETTIA (L. E. Weeks)

A pure light spectrum red, florets slightly ruffled. It classes in 450 blooming time is 85 to 90 days. The plant grows to a height of 50 to 55 inches and spikes carry up to 21 buds, opening up to 7. Propagation is good, germination is fair.

Poinsettia was tested in the 1950 N.A.G.C. trial gardens. Out of 61 seedlings tested, but 5 were approved and of this number, Poinsettia rated third. It was also approved as disease resistant in Florida tests. Poinsettia has not been shown at any of the large shows, but has won locally whenever displayed. Supposed to be the finest old rose commercial. Makes good spikes and I am told brings in extra prices as a cut flower.

THEMESONG (Klein 47) 570-88

Mallow purple with a cyclamen blotch. Tall straight spike with 7 or more slightly hooded florets open. An unusual color.

TITAN (Palmer 39) 532-85

Huge salmon-rose. Opens up to 9 large blooms on a very tall plant. Wonderful variety that should be better known. This is a good exhibition glad and is one of Palmer's best.

TIVOLI (K. & M. 47) 461-90

A beautiful warm tone pure pink that opens 8 on a good spike. One of the best of the new glads from Europe. A pleasant surprise awaits you when you grow Tivoli.

TOPSCORE (Kooy 47) 451-80

A vivid vermilion-red of good size. Makes good spikes with rather loosely attached florets.

UHU (K. & M. 46) 482-85

Unique color. Uhu reminds me of a lobster before cooking. A dusty brown which is a fine smoky. Stem is medium tall. Vigorous grower that never crooks. Opens 7 well placed florets. This sells itself on sight.

VICTORY QUEEN (Wilson 45) 430-95

Beautiful salmon-orange with a cream throat. A tall strong grower with 6 to 8 large florets open on an 8 inch flowerhead. A sure winner and a coming commercial. Wilson's best.

VULCAN (Stevens 42) 470-82

One of the most beautiful purples that opens 6-8 large wide open blooms. It is a tall grower. Am sure you will love Vulcan.

VOODOO (Kadel 44) 486-80

Voodoo is a great novelty and exhibition glad. It has 6 inch ruffled and needle-pointed florets and is a smoky — wine-bronze or plum. It is a good show glad that has won four sectional championships and the American Home achievement medal.

WHITE GOLD (Scheer 41) 506-70

A very large cream. A tall grower and one of the sensational show glads. It has won about every prize you can think of and is a very good early commercial.

YANGTZE (Harris 41) 312-87

A deep empire yellow of good size A first class grower that is very popular in Canada. This is one of the best low price yellows. Very fine.

YELLOW HERALD (K. & M. 47) 411-70
Certainly the best early yellow. Opens 8 on a tall spike. Has a nice ruffling and is one that we recommend for all cut flower growers.

ZELLADEE (Kaylor 46) 466-85
A new lavender that looks very good to us. A tall grower, but not a heavy stem. Will open 6 to 8 on a 20 bud spike. Opens well after cutting. Florets are 5 inches across and ruffled.
